Monday, April 23rd at 3:30 pm
Southern Hall 303
at The University of Southern Mississippi

Speaker: Robert Rubalcaba
National Security Agency

Title: History of Cryptography

Abstract:
From Demaratus and Histiaeus to Ceasar, from Mary Queen of Scots to Hitler, cryptography has played an important role in world history. Substitution, transposition and polyalphabetic ciphers, and the famous Enigma machine will be discussed. We will finish with cryptography that is in use today.

Further Information
Further details and information about this and other departmental activities is available online at http://www.usm.edu/math.
