Do you have an interest in learning LaTeX? LaTeX is a document preparation system that is widely used for the communication and publication of scientific documents in many fields including mathematics, physics, computer science, statistics, economics, and political science. LaTeX is also very useful for preparation of presentations as well as professional documents such as resumes and CVs. Come join us for an interactive beginners workshop in LaTeX where you will learn how to begin a document and get useful guidance to get you started, with a more advanced follow up session in the future.
